SITEXCOLABEL
LASER CLEANER FOR ANILOX ROLLS

SITEXCO LABEL: SMALL & POWERFUL

The new LABEL line follows the LOGICAL COST model and offers a simplified version that adapts better to meet demand with the best quality-price ratio.

The SITEXCO LABEL L10 is not just a smaller machine, it is a version designed exclusively for the label market that reduces features to the essentials while maintaining the safety, reliability and quality of PLUS cleaning: State-of-the-art laser technology, meeting all SITEXCO requirements.

The SITEXCO LABEL L10 has all the features needed for optimal cleaning of narrow web anilox rolls. This optimal quality is thanks to the fact that, like any laser cleaning system, it offers far superior cleaning at any line screen, ensures consistent print quality, recovers the volume of clogged cells, requires no consumables and generates no waste.

In addition, the SITEXCO LABEL L10 incorporates point-to-point selective cleaning technology, which prevents overlapping to ensure the safest and fastest results. The PLUS technology selective cleaning programmes ensure that the cleaning quality is excellent for all surfaces and ink types.

SPECIFICATIONS:

- 🕒 Approximate cleaning time: Depends on roller size (between 5 and 15')
- ⚙️ Operation: Exceptionally simple
- ⚙️ Optional extras: None
- 📦 Accessories: Supporting table

DIMENSIONS	TECHNICAL SPECIFICATIONS	
Length. 885mm / 34.85"	Maximum roller length:	Minimum roller diameter. 35mm / 1.38"
Height. 750mm / 29.53"	Maximum wash length. 500mm / 19.68"	Total roller weight. 20Kg / 44lb
Width. 574mm / 22.60"	Maximum roller length (shafts). 800mm / 31.49"	Electric power. 1.5Kw
Weight. 100 Kg	Maximum roller diameter. 120mm / 4.72"	Electricity supply. 120/230V (Single or Dual phase) 50/60Hz

SHARED FEATURES SITEXCO LINE vs LABEL L10 MODEL

- ✓ Optimal quality.
- ✓ Parts from proven, first-class manufacturers.
- ✓ Maximum safety.
- ✓ Minimal maintenance.
- ✓ No water or chemicals needed.
- ✓ No waste (eco-friendly).
- ✓ Negligible noise and/or odour pollution.
- ✓ Roller can be used immediately after cleaning.
- ✓ No need to remove any part of the roller for cleaning.
- ✓ Recovers the volume of the cells. Saves time in formulation and pigment, as the ink formula is always the same.
- ✓ Lets you control cleaning and waste costs.
- ✓ 14 months warranty (2 years for the laser)
- ✓ Cleaning programmes (total laser management that allows for thorough, controlled cleaning).
- ✓ High-capacity filter (adapted to the size of the model).

“PLUS technology adapted to the specific needs of the targeted sector. All the advantages of cleaning with SITEXCO PLUS laser technology”

DISTINGUISHING FEATURES SITEXCO LINE vs LABEL L10 MODEL

- ✓ Lightweight, desktop machine with an attractive, no-frills design. Applies a “less is more” concept to offer the customer the greatest value.
- ✓ Focused on the real needs of the Narrow sector, it offers a machine that’s simple, reliable and safe, with no unnecessary extras.
- ✓ Price: A state-of-the-art machine for the price of conventional systems. Intuitive and easy operation.
- ✓ Functionality: Cleans most inks in any line screen.
- ✓ High-capacity external filter.
- ✓ Only needs an electrical connection.
- ✓ Unique cleaning speed.
- ✓ Line (there is only model L10).
- ✓ HMI for management.
- ✓ No optional add-ons.
- ✓ No Internet connection.

“All the advantages of laser technology for the price of conventional technologies, bypassing Premium add-ons and maintaining optimal quality”
