

# LUX® ITP™ EPIC®

Lastre in fotopolimero

LUX In-the-Plate™ (ITP) EPIC offers a unique micro-rough surface plus our award-winning flat-top dot technology right out of the box. The innovative cap layer delivers excellent ink transfer in challenging flexo print applications and ensures the plate provides the best tonal range possible.

Eliminating the need for surface screening, LUX ITP EPIC streamlines your workflow, reduces RIP time and file size, and improves print consistency.

LUX ITP EPIC offers near 1:1 mask-to-plate imaging capability, thus minimizing the need for a bump curve. By reducing the bump curve, printers are able to expand the available color gamut and print a smaller dot.

LUX ITP EPIC is a durable and extremely low tack plate, which is perfectly suited for long and clean running print jobs. Count on the company that elevates your print to the next level - MacDermid.

## CARATTERISTICHE & BENEFITS

- Punto piatto direttamente in lastra
- Eccellente trasferimento dell'inchiostro
- Tecnologia lastra pulita brevettata
- **A balanced plate surface for low image gain and exceptional solids coverage**
- **Eliminates the need for surface screening**
- Ridotto ingrossamento del punto
- Eccezionale durata e copertura
- Bassissima appiccicosità
- Processabile a solvente o termicamente
- Compatibile con dispositivi di esposizione LED UV

## APPLICAZIONI

- Imballaggi flessibili 
- Etichette 
- Cartone pieghevole 
- Borse e sacchetti multistrato
